

Liverpool John Moores University Refurbishment Scheme (over 2 phases)

Whitfield & Brown have undertaken and completed two refurbishment schemes at the Byrom Street Campus in recent years.

The busy city centre location of this project meant that great care and attention was needed throughout and close communication with the client to ensure that the works were carried out in a safe manner causing the minimum disruption to both the college and the general public.

The first phase involved the refurbishment and remodelling works to laboratories and corridors with an approximate value of £1.2 million.

The second phase included laboratories and the remodelling of the main entrance area to this busy building. The phase was worth approximately £0.7 million.

During both phases the building remained in use throughout by both students and staff.

“great care and attention were essential at this busy city centre location”.

building on our reputation
