Case Study

Royal Liverpool & Broadgreen Hospital Refurbishment of Breast Care Clinic

The works comprised the complete refurbishment of Ward 9Y, a 25 bed surgical ward specialising in thyroid & breast surgery.

The works were undertaken within a 'live operational' hospital building and required considerable liaison between our site management team, the design team and the Hospital to ensure the works caused the minimum of disruption to the operation of the Hospital, in particular the adjacent wards.

Contract Title: Refurbishment of Breast Care Clinic

Client: Royal Liverpool & Broadgreen University
Hospital NHS Trust
